

SALIM FRAJ

Calgary, AB | salim.fraj@gmail.com | salim-fraj-portfolio.vercel.app | github.com/salimfraj

PROFILE

Software Development graduate (Bow Valley College, April 2026) with strong full-stack web development skills across React, TypeScript, Node.js, Python, and SQL. Experienced building and shipping production applications integrating multiple APIs, implementing secure authentication, designing RESTful backends, and deploying with Docker and CI/CD pipelines. Builds with AI tools daily to accelerate development. Detail-oriented problem solver who takes full ownership from requirements through deployment.

PROJECTS

Tiffany Bleu Beauty Lounge | Full-Stack Client Project | Next.js 15, TypeScript, Sanity CMS, Resend, Cloudflare 2025

- Conducted end-to-end business and SEO research before writing a line of code: analyzed competitor sites, target demographics, and local search patterns, then implemented BeautySalon JSON-LD, Open Graph, sitemap, canonical URLs, and Google Business Profile optimization
- Evaluated CMS platforms against client needs, recommended and built Sanity as headless backend with 10+ custom document types the client manages independently
- Designed and built a secure contact form with rate limiting, honeypot anti-spam, and Resend transactional email delivery to convert visitors into booked clients
- Set up complete business infrastructure alongside the build: domain registration, DNS configuration, Cloudflare security layer, transactional email accounts with SPF/DKIM/DMARC, Google Analytics, and Google Business Profile
- Hardened HTTP security headers (CSP, X-Frame-Options, Permissions-Policy, Referrer-Policy); implemented ISR with 60-second revalidation and built a resilient fallback data layer for zero-downtime if CMS is unavailable
- Built fully responsive custom CSS design system from scratch with scroll-aware nav, keyboard accessibility, focus trap, and WCAG 2.1 AA compliance
- Conducted pre-launch audit of Core Web Vitals, accessibility, and TypeScript strict-mode before client handoff

DinnerHelp | AI-Powered Progressive Web App | React 19, TypeScript, Firebase, Groq AI, Zustand 2024

- Built and deployed a full-stack AI application integrating Groq AI API, Firebase Auth, Firestore real-time sync, and PWA standards
- Managed complex async state across multiple service boundaries using Zustand, ensuring consistent data flow and predictable UI behavior
- Implemented secure authentication, offline capability, and cross-device compatibility for production-grade reliability
- Deployed via Vercel with CI/CD pipeline using GitHub Actions for automated testing and deployment

Smart Restaurant | Full-Stack Web Application | React, Node.js, Express, MySQL, Docker, JWT 2024

- Designed and built a RESTful API backend with Node.js and Express, implementing JWT authentication and role-based access control
- Modeled a relational MySQL database with migrations and optimized queries supporting transactional operations across user roles
- Containerized the full stack with Docker Compose for consistent environment management across development and production
- Documented all API endpoints, data models, and integration points throughout the development cycle

ERPNext v15 Implementation | Client Deployment | Frappe Cloud, ERPNext 2025

- Scoped, configured, and integrated Stock and Manufacturing modules for a live client deployment on Frappe Cloud
- Documented requirements, workflows, and data configurations; conducted user acceptance testing and validation before go-live

E-Commerce Payment Integration | Personal Project | Next.js, Stripe API, PayPal API 2024

- Integrated Stripe and PayPal REST APIs, implementing checkout flows, webhook handling, and payment confirmation logic
- Implemented webhook signature verification and API error handling to ensure reliable payment processing

Portfolio Website | Personal Project | Next.js, TypeScript, Tailwind CSS, Vercel 2025

- Built a fully responsive portfolio site with server-side rendering, SEO optimization, and CI/CD deployment pipeline

EXPERIENCE

Senior Coding Instructor (Code Sensei) | Code Ninjas | Calgary, AB 2023 - Present

- Teach web development including HTML, CSS, JavaScript, TypeScript, and React to students across all skill levels
- Mentor students through complete project cycles from initial concept to working product delivery
- Troubleshoot software, API, and environment issues in real time, diagnosing root causes systematically
- Train new instructors on platforms, tools, and teaching practices
- Use Claude, Cursor, and GitHub Copilot daily as core development and productivity tools

Coding Camp Curriculum Developer | Bow Valley College | Calgary, AB Aug 2025 (Contract)

- Delivered complete technical curriculum and configured lab environments under a four-week compressed timeline with minimal supervision
- Validated all technical lab environments prior to deployment, catching configuration errors before launch
- Produced comprehensive documentation to support consistent, repeatable delivery by other instructors
- Familiar with D2L learning management system as both student and content developer

EDUCATION

Software Development Diploma | Bow Valley College, Calgary Dean's List Graduated April 2026

CERTIFICATIONS

Google Cybersecurity Certificate (Coursera)	2024
Meta Front-End Developer Certificate (Coursera)	2024
CS50: Introduction to Computer Science (Harvard / edX)	2023

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Zustand, Tailwind CSS, Bootstrap, HTML5, CSS3, PWA, responsive design
Backend and APIs: Node.js, Express, Python, PHP, REST API design, JWT, MySQL, Firebase Firestore, SQL
DevOps and Tools: Docker, Git, GitHub Actions, CI/CD, Vercel, AWS (fundamentals), Linux CLI
AI Tools: Claude, Cursor, GitHub Copilot, Groq AI API, LLM integration
Languages Spoken: English, French, Arabic, German
